HTML ASSIGNMENT -1

Design a website for a College. There should be at least 5 web-pages present in the web-site.
There should be:
- One Home page that leads to other pages. The Home page should contain the name of the college as heading along with the college logo.
- There should be a tab with the following links:
  - Home;
  - Academics
  - Admission
  - Gallery
  - Contact Us
- One Academics page which contains a list of all the departments present in the college Arts, Science and Commerce. The list should be a nested list, with available courses mentioned under each department. There should be a minimum of two courses under each department, (for e.g. Computer Science and Mathematics under Science, English and Sociology under Arts and so on).
- One gallery page that contains set of photos taken of the college and its students.
- The Admission page basically contains a form that a student needs to fill up in order to take admission in the college. The form should ask all the necessary questions using appropriate form elements.

Please note that each web-page in this website should have the same background Image/color. The looks of each page should be similar.
